Sell more properties and stand out from the crowd

What is Digital Signage?
Essentially, digital signage is a commercial grade TV screen mounted to a ceiling, wall or in a display cabinet which is connected to a media player. You are able to create templates with your own logo and branding with different ‘zones’ within the template. Within each zone you can display websites, images, videos, RSS feeds and even live television — ideal for displaying images, floor plans and EPC charts and property details.

Why Estate Agents?
Digital Signage can work alongside your existing window display or can be a complete standalone solution. Create eye catching property details which can be updated easily from the comfort of your desk meaning that as soon as you get an instruction you can start selling it. Digital Signage offers superior return on investment compared to traditional printed media window.

About IDN
IDN Digital Visual Communications are specialists in collaborative, interactive technologies and digital signage. Our objective is to enhance business productivity, collaboration and communications in organisations by integrating and supporting the adoption of technology. We have years of experience installing Digital Signage, Video Conferencing and SMART Interactive Whiteboards for businesses.
